

JEREMY EDUDZI AVADZI

Data Scientist

jeremyavadzi@gmail.com | 0505971349 | [linkedIn](#) | Accra, Ghana

PROFESSIONAL SUMMARY

Computer Engineering graduate with professional experience in network operations, IT support, data analysis, and technical problem-solving. Trained in Data Science, AI, and Machine Learning, with practical experience using Python, SQL, Excel, Power BI, and data visualization tools to analyze data and generate actionable insights. Experienced in technical operations, system troubleshooting, reporting, stakeholder coordination, and developing data-driven solutions through academic and hands-on projects.

CORE SKILLS

- Data Analysis & Interpretation
- Data Cleaning & Preparation
- Exploratory Data Analysis
- Statistical Analysis & Modeling
- Machine Learning
- Data Visualization & Storytelling
- Business Intelligence & Reporting
- Python & SQL
- Power BI & Excel
- Network Operations
- IT Support & Troubleshooting
- Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst

Ovaview Media Monitoring, Accra, Ghana

| April 2026 – Present

- Monitor and collect relevant news stories from newspapers, websites, television, and radio across sectors including banking, agriculture, aviation, energy, oil & gas, mining, insurance, and real estate.
- Capture, classify, and maintain media data and metadata within the Ovaview monitoring dashboard, ensuring accurate, well-organized information for client reporting.
- Analyze media coverage and sentiment to identify positive and negative trends, helping clients understand their media presence and industry developments.
- Use SPSS to analyze collected media data, identify coverage patterns and trends, and generate analytical reports for clients across sectors.

Network Operations Support

| Nov 2024 – Dec 2025

American Tower Corporation (ATC) Accra, Ghana -- Hybrid

- Monitored 3,000+ nationwide Base station sites using Invendis (Piz Gloria), ensuring outages were tracked and power availability targets were met.
- Managed and resolved downtime tickets in Salesforce with proper RCA documentation, timely escalation, and accurate closure.
- Coordinated with vendors, field engineers, and telecom clients including MTN and Telecel to resolve outages, manage site access, and restore services within defined timelines.
- Configured and troubleshot ACSYS/IAMS systems, managing backend assignments to support secure site control.
- Trained and onboarded 50+ field engineers on systems and access procedures to improve efficiency and reduce outage issues.
- Generated power, outage, and performance reports to support SLA and MTTR tracking while maintaining NOC procedures and reporting standards.

GCTU IT Support Officer

| Aug 2023 – Dec 2023

Ghana Communication Technology University (GCTU), Accra, Ghana

- Delivered first-level technical support for software and OS issues, including Windows 10/11, Microsoft Office, Outlook, and VPN connectivity.
- Logged and tracked IT support tickets, ensuring timely updates and accurate documentation throughout the resolution process.
- Provided hardware support by replacing RAM, screens, and basic laptop components for 50+ PCs and setting up video conferencing equipment.
- Assisted with setting up the university LAN, wireless access points, routers, switches, and cabling to support network stability and connectivity.

Loan Sales Representative

| Mar 2021 – Oct 2021

Dalex Finance – Ho, Ghana

- Conducted outbound calls to prospective customers, promoting loan products, identifying customer needs, and generating qualified leads.
- Assessed customer financial needs and explained loan terms, eligibility criteria, interest rates, and repayment plans.

- Maintained follow-up with interested clients and supported them throughout the loan application process.

EDUCATION

BSc Computer Engineering | Jul 2025

Ghana Communication Technology University (GCTU)

WASSCE CERTIFICATE | Jul 2019

Sogakofe Senior High School

CERTIFICATIONS & TRAINING

- Data Science, AI and Machine Learning — Blossom Academy (2026)
- Cisco Certified Network Associate (CCNA) — Improtech IT Training Centre (2025)

PROJECTS

Google Ads Click Prediction System

Analyzed 26,000+ Google Ads campaign records from 2020–2024 to build a machine learning model for predicting ad clicks. Evaluated multiple regression algorithms and achieved 97% R^2 , with RMSE of 6.32 and MAE of 1.26 using the best-performing model. Developed a Streamlit prediction platform to support campaign performance estimation and marketing decisions.

AgroConnect Ghana A/B Testing Project

Analyzed data from 3,000 farmers to test whether agricultural advice delivered through WhatsApp voice notes performed better than traditional SMS. Found that voice notes increased crop yields by 4.2% and identified that higher yields did not necessarily increase final net profit because of rising farming costs.

Maternal Mortality Data Analysis

Extracted and cleaned global maternal mortality data from Our World in Data, analyzed historical trends, and created comparative visualizations. Identified long-term improvements while highlighting regional differences in maternal mortality.

KEY ACHIEVEMENTS

- Trained and guided 100+ MTN and Telecel field engineers on ACSYS keys and padlocks to support smooth site access and maintenance routines.
- Selected for supervisory responsibilities in the NOC based on outstanding performance, supporting team coordination and work efficiency.
- Supported analysis and reporting of damaged solar panels across 1,000+ sites, contributing to management action on property damage costs.

PROFICIENT TOOLS

Programming & Data: Python, SQL, Pandas, NumPy

Visualization: Power BI, Matplotlib, Seaborn, Plotly

Business & CRM: Excel, Salesforce, SPSS, Google Workspace

Technical Operations: ACSYS/IAMS, Invendis (Piz Gloria), Computer Hardware & Troubleshooting

Design: Adobe Photoshop, Canva

ADDITIONAL INFORMATION

Languages: English (fluent), Ewe (native), Twi (basic)

Interests: PC Building, Football, Aviation
